

Flip Book Project Installation

Downloading Wampserver

1. Download Wampserver.
2. Once it's installed, run it.
3. The 'W' icon will appear at the bottom right corner of your screen.
4. Click it once and click on phpMyAdmin. This will open up a link to a login screen for phpMyAdmin.
5. If you're a first time user, type in root as the username and leave the password blank. Click on "Go."
6. Change the password to "root1234" so that it matches our password.

Creating a new database

1. On the side menu, click on the button that says "New" to create a new database.
2. Name the database "flipbook" and click on 'create.'

Creating a new table

1. You will be redirected to a page where you can create a table. Name this table 'users' and change the number of columns to 6. Click on 'Go.'
2. You will be redirected to a page where you can fill the table out with column names.
3. Name the first row 'email' with 'varchar' as the type, and '100' as the length. Set the index to 'primary.'
4. Name the second row 'password' with varchar as the type, and '100' as the length.
5. Name the third row 'fname' with varchar as the type, and '100' as the length.
6. Name the fourth row 'lname' with varchar as the type, and '100' as the length.
7. Name the fifth row 'securityAns' with varchar as the type, and '100' as the length.
8. Click on 'Save.'
9. The same process will be done for the tables 'userinquiry,' 'posts,' 'confirmseller,' 'confirmbuyer,' and 'cart.'

Setting up the files

1. Go to the folder where you have wamp installed. Open it up. There should be another folder called 'www' inside.
2. Go into the 'www' folder and then create a new folder called "userregistration".
3. Copy your existing files into this folder, and create any new files needed in this folder.

Testing the project

1. Go to your browser and type in 'localhost/userregistration/index.php' to go to the Flip Book landing page. From here, you can either register for a new account, or sign into an existing account. Your data will be stored in the tables in the phpMyAdmin database.
2. Once registered/logged in, you will be taken to the main Flip Book UI where the rest of the functionalities can be tested.
